```java
 1  package me.jamiepeterson.a13userandpassword;
 2
 3  public class Password {
 4
 5      private String username;
 6      private String password;
 7
 8      //Constructor
 9      public Password(String fname, String lname, String dob){
10          //Make the Username
11          username = fname.charAt(0) + lname + dob.substring(3,5);
12          username = username.toLowerCase();
13
14          //Make the Password
15          password = fname.substring(0,1) + fname.substring(fname.length()-1)
16                  + dob.substring(0,2) + dob.substring(8,10) + lname.substring(0,3)
17                  + fname.length() + lname.length();
18          password = password.toLowerCase();
19      }
20
21      public String getUsername() {
22          return username;
23      }
24
25      public String getPassword() {
26          return password;
27      }
28  }
29
```
